DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on October 11, 2007 has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on October 12, 2007, October 15, 2007, and November 21, 2007 was filed after the mailing date of the Allowance on September 12, 2007. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

3. Claims 24, 30-32, 35, and 39-57 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or make obvious the steps or means for "the call connection and the signaling link utilize a Feature Group D **trunk** between the telephony platform and the PSTN", when such trunk is considered within the specific structure of the device recited in claim 24 or the method of claim 35.

The prior art of record fails to teach or make obvious the steps or means for **"transporting originating calling party identification information from the gateway through the PSTN to the called subscriber line while the called subscriber line is in an on-hook condition"**, when the transporting is considered within the specific structure of the method of claim 30. The prior art of record fails to teach or make obvious the steps or means for **"the first telephone switching office is adapted to recognize a voice call arriving from the gateway, obtain originating caller identification information from the gateway, and signal the originating caller identification information to the second telephone switching office"**, when such caller identification information is considered within the specific structure of the device recited in claim 39. The prior art of record fails to teach or make obvious the steps or **means for "sending a first signaling message over a packet-switched data network to the gateway using the identity of the gateway, the first signaling message including the telephone number of the called party and a telephone number of the calling station"**, when the sending is considered within the specific structure of the method of claim 42.
